

Each panel below is the **same store structure** (header · hero · "how custom works" · product cards · live configurator with price) rendered in a different **visual direction**. The shelf styles **Tile** and **Art Back** appear as selectable options — the system is not limited to them. Pick one primary direction (accents can be borrowed across directions). Full specs: **docs/02-UI-Design-Standard.md**.

01

Atelier Gallery

Museum-grade minimalism. The product is the artwork; the UI disappears.

Type: serif display + grotesque body

Best for: premium positioning, hero renders

Trade-off: needs superb imagery

Next step: approve one primary direction (Decision D2 in the Master Plan). Accents — e.g. the Showroom (10) / Tech (6) configurator HUD — can be borrowed into a warmer primary such as Atelier Gallery (1) or Modern Luxe (3). These are flat HTML/CSS approximations of palette, type feel, and layout — not the production build.
